This house is just such a natural beauty: Who will not love full height windows wrapping around 2 living rooms, bringing glamorous light, colors and shapes from a picturesque garden? Who will not like large, spacious open plan living areas in soothing light color tone and with clean-line finishes?

The garden masterfully brings together local and imported plants, forming interesting inter-plays among them but occasionally, naughtily breaking them up with creative and unique ornaments and then orchestrating all elements in perfect harmony, under blue sky and in golden sun glitters and gentle bay breeze.
